Abstract

A short abstract summarising the aims, methods, results and conclusions of the dissertation.

Contents

1	Introduction	4
2	Literature Review	5
3	Methodology	6
4	Results	7
4.1	Overlap Scores	7
4.2	Accuracy Distribution	7
5	Discussion	9
6	Conclusion	10
A	Appendix A – Code	11

List of Figures

4.1	Overlap score distribution per prompt type.	7
4.2	Distribution of top-1 accuracy across all experiments.	8

List of Tables

Chapter 1

Introduction

Provide background, motivation and objectives.

Chapter 2

Literature Review

Summarise relevant works and position your contribution.

Chapter 3

Methodology

Describe data generation, profiling, LLM prompting, scoring and evaluation.

Chapter 4

Results

The experimental results are summarised in this chapter. We evaluated three prompting strategies (zero-shot, structured, and few-shot) across synthetic user profiles.

4.1 Overlap Scores

Figure 4.1 shows the overlap score (the proportion of top-3 recommendations that match the rule-based baseline) for each prompt type.

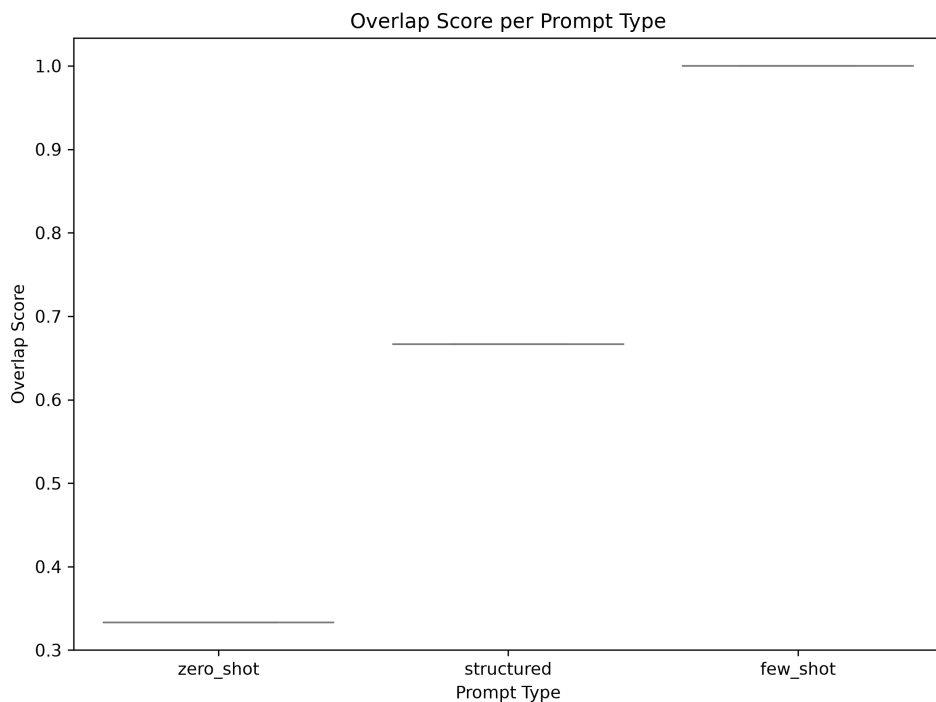

Figure 4.1: Overlap score distribution per prompt type.

4.2 Accuracy Distribution

The overall accuracy (top-1 match rate) is shown in Figure 4.2.

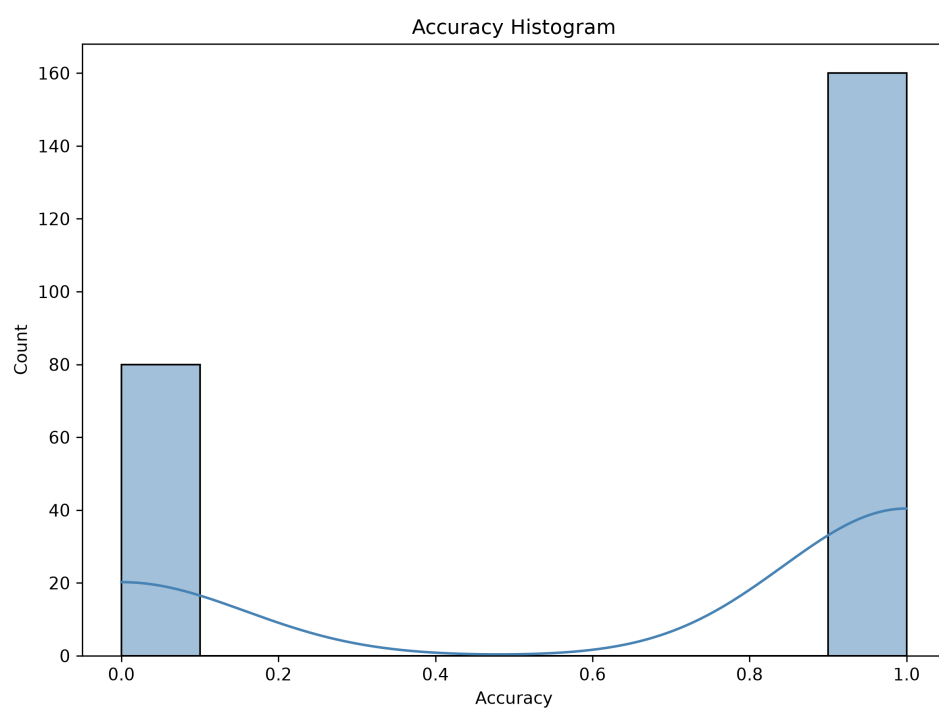

Figure 4.2: Distribution of top-1 accuracy across all experiments.

Chapter 5

Discussion

Interpret findings, limitations and future work.

Chapter 6

Conclusion

Summarise key contributions and take-aways.

Appendix A

Appendix A – Code
